Ex-5 DESIGN: Wireframe – mobile app with localization features

Screen 1: Language selection

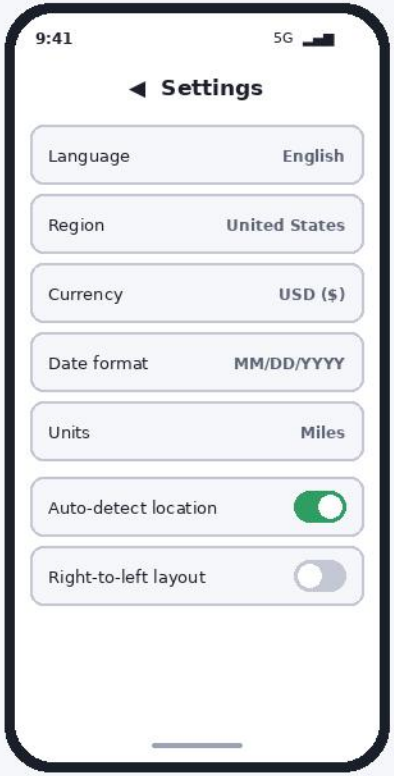

- Language list with radio buttons
- Auto-detect from device region

Screen 2: Home (localized)

- Location bar shows city and region
- Currency, distance, date adapt to region

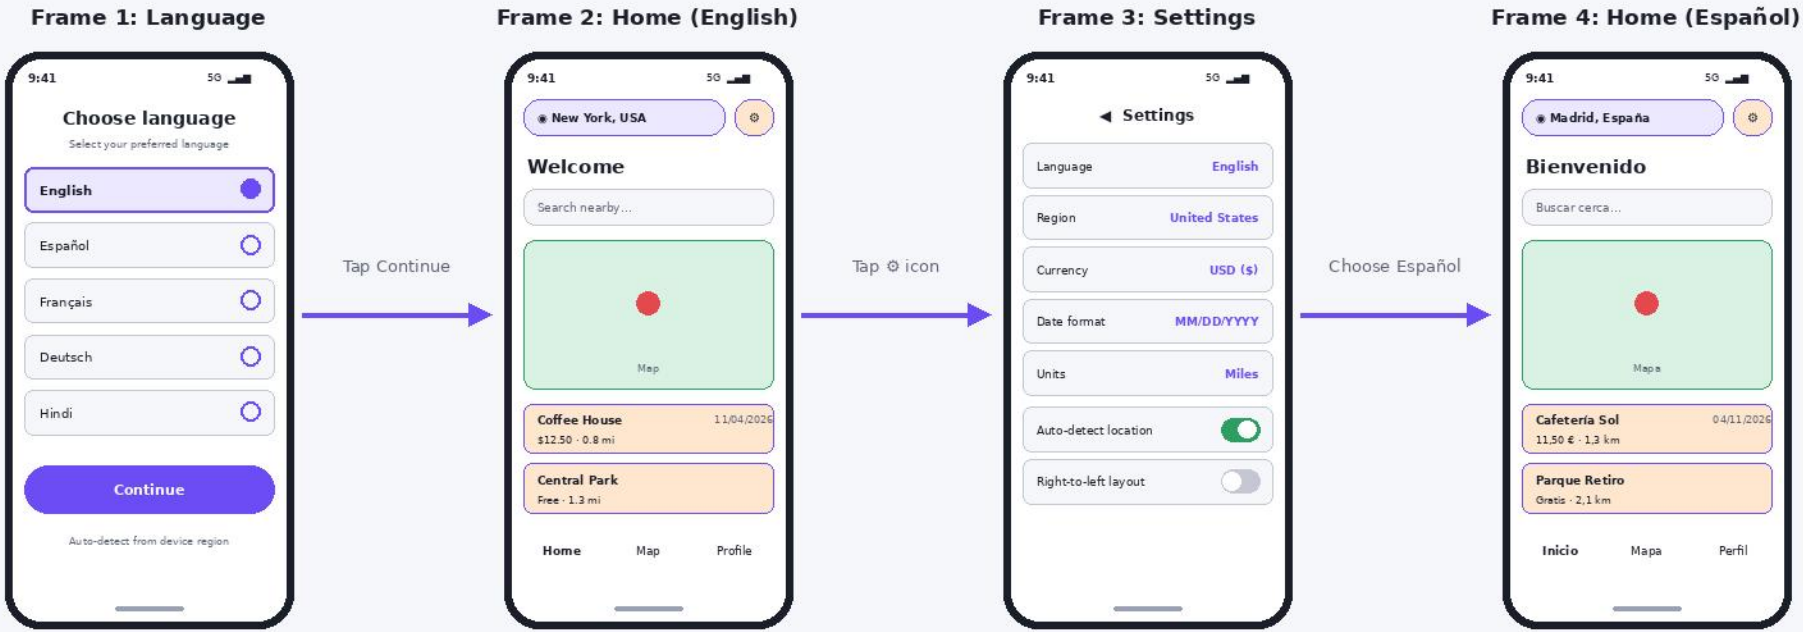

Screen 3: Localization settings

- Language, region, currency, date, units
- Toggles: auto-detect, right-to-left

Frame: iPhone 14 (390 x 844) | Font: Inter | Wireframe fills grey | Components: List item, Radio, Toggle, Button, Nav bar | Layout supports RTL

Ex-5 PROTOTYPE: Localization flow (On click → Navigate to, Smart Animate)

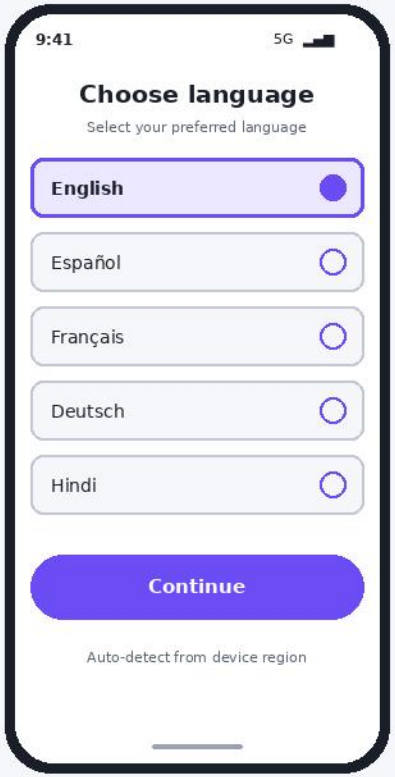

Trigger: On click | Action: Navigate to | Animation: Smart animate, 300 ms, ease-out | Start frame: Frame 1

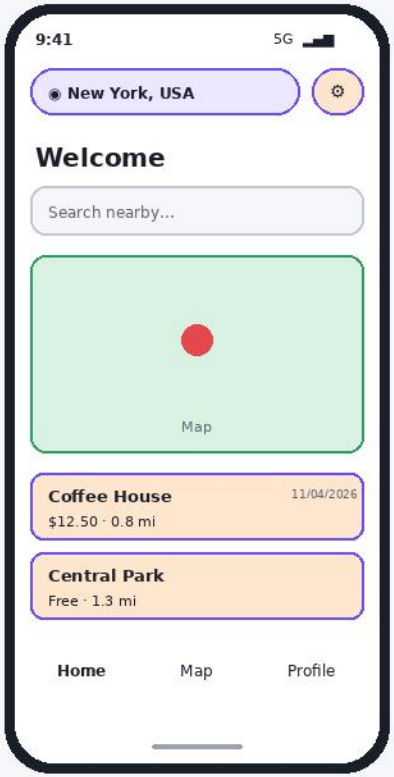

Frame 4 shows the same app localized: Spanish text, Madrid location, euro currency, DD/MM/YYYY date and kilometres.

Ex-5 OUTPUT: Localized mobile app screens

Language selection

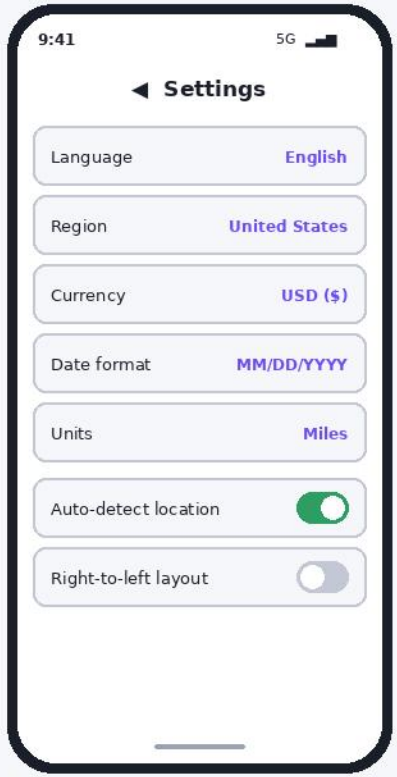

Home – English / USA

Home – Español / España

Localization settings

Localized: language, location, currency ($ vs €), date (MM/DD vs DD/MM), units (miles vs km)
