EX-9

User Interface Prototype for a GSM Service

Designed and prototyped using Figma

Part 1 - Design (design system + wireframes)

Part 2 - Prototype (flow + interactions)

Part 3 - Output (final hi-fi screens)

PART 1 - DESIGN: Design System

App: SignalOne (GSM service)

Colour styles

Primary
#5B3CC4

Accent
#00B8A0

Dark text
#1E1B3A

Muted
#8A87A3

Background
#F5F4FB

Border
#E1DEF0

Typography (Inter / Poppins)

Heading 1 - 28 Bold

Heading 2 - 20 Semibold

Body - 14 Regular

Caption - 11 Regular

Components

Primary button

Secondary button

Input field

Popular

Layout and grid

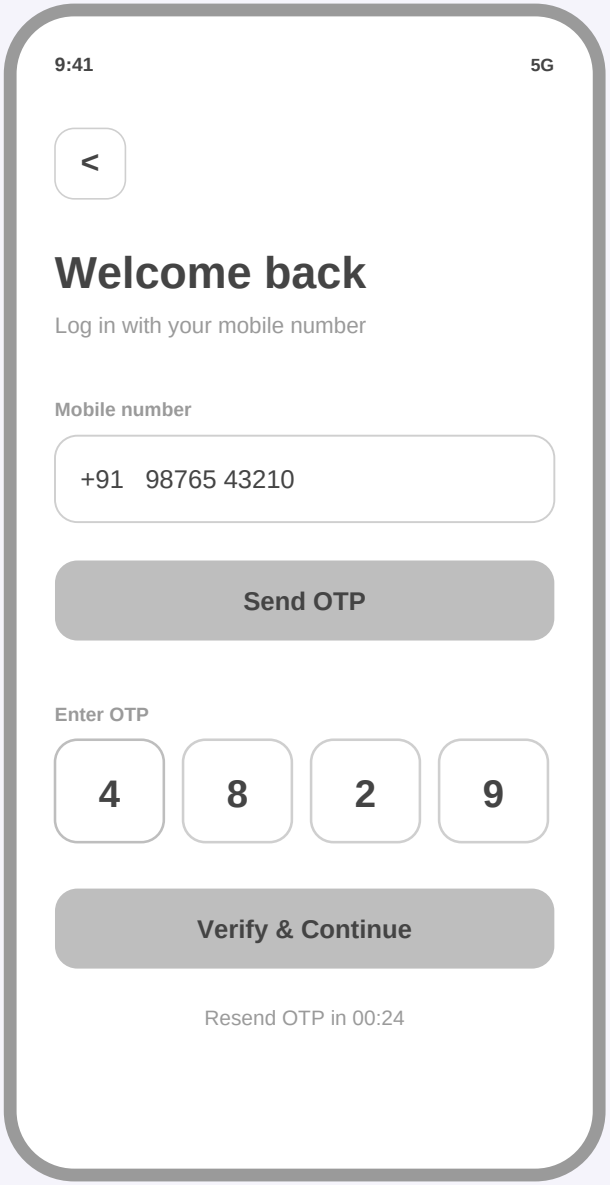
- Frame: iPhone 14 (390 x 844) - Auto Layout on every card and button
- Grid: 4 columns, 24 px margin, 16 px gutter; spacing scale 8 / 16 / 24 / 32
- Corner radius: buttons 14, cards 22; icons 24 x 24 grid
- Components + Variants: Button (default / pressed), Plan card (normal / selected), Nav item (active / inactive)

PART 1 - DESIGN: Low-fidelity wireframes (1/2)

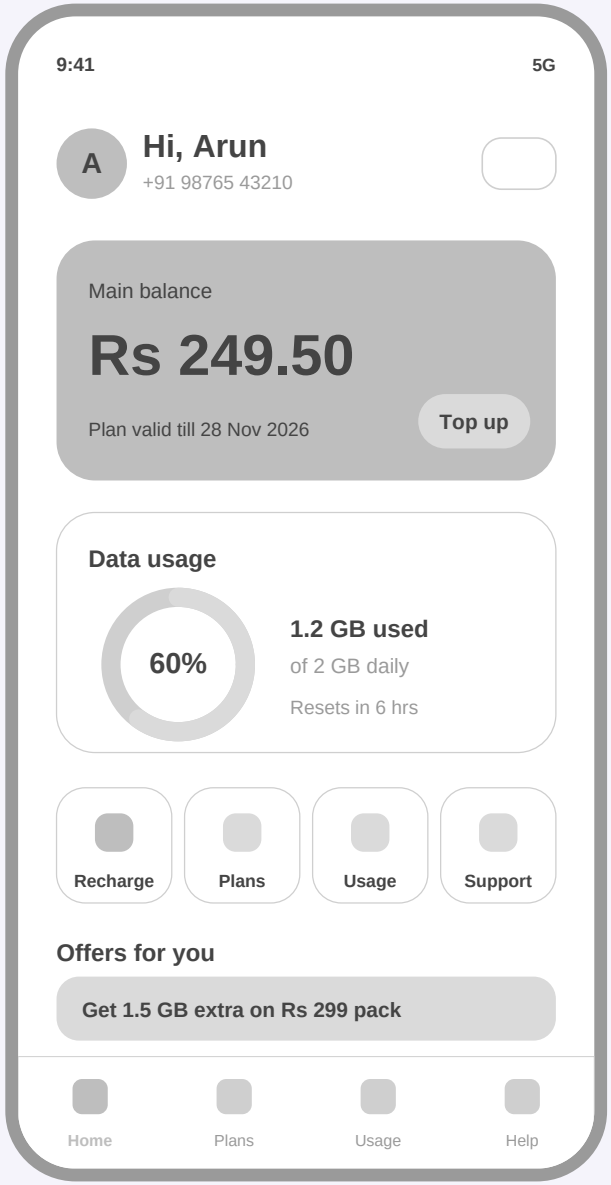
Greyscale layout before styling

Frame 1 - Splash

Frame 2 - Login



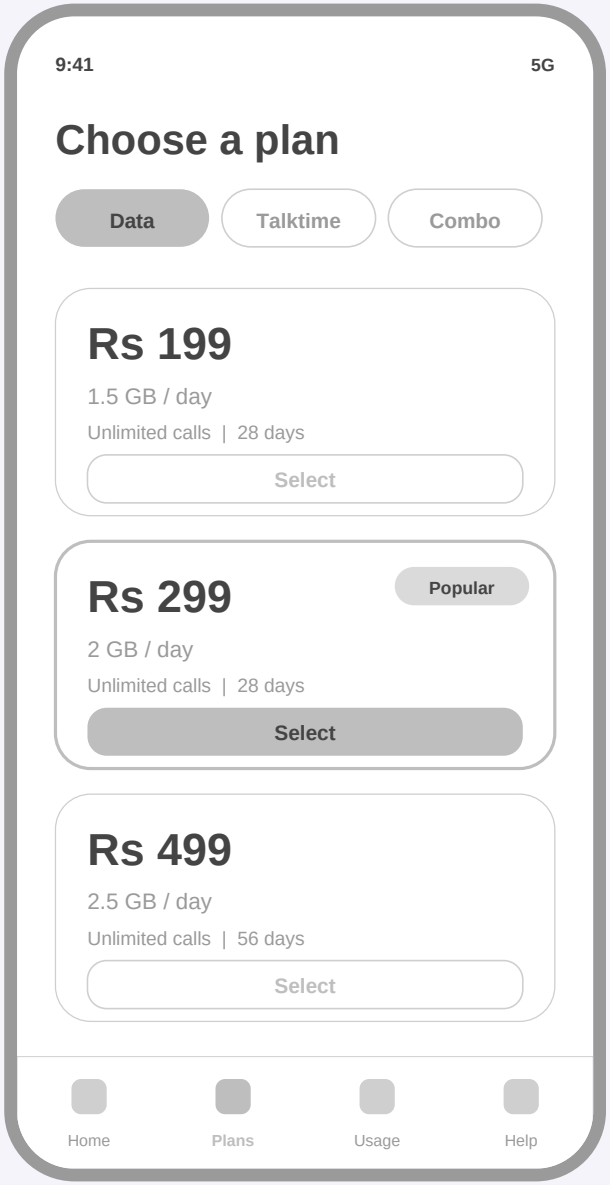
Frame 3 - Home



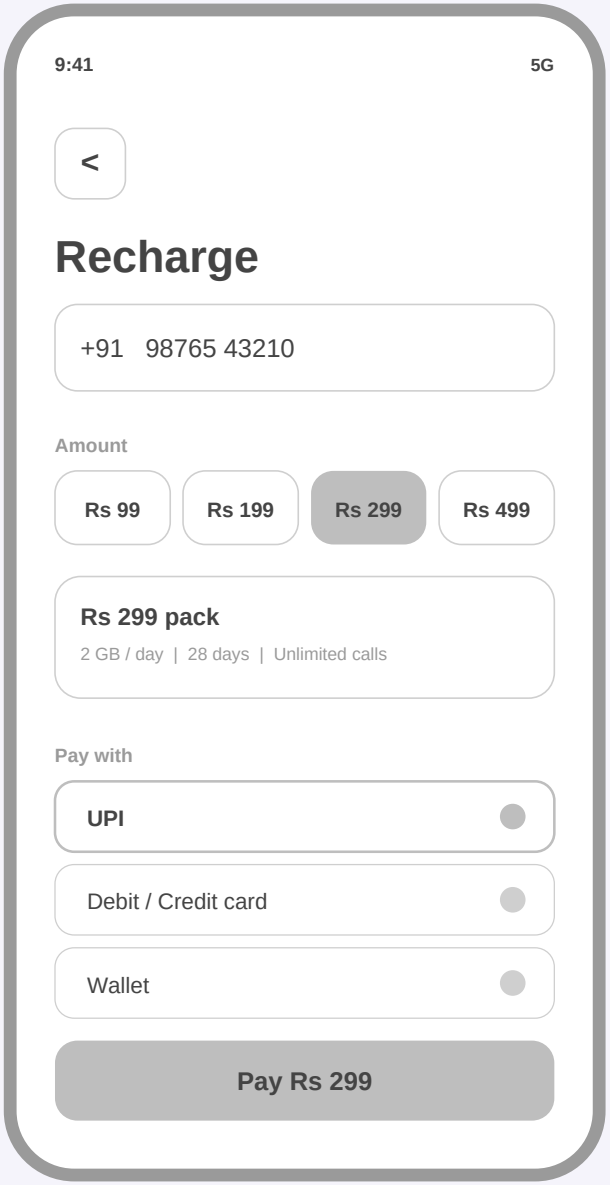
PART 1 - DESIGN: Low-fidelity wireframes (2/2)

Greyscale layout before styling

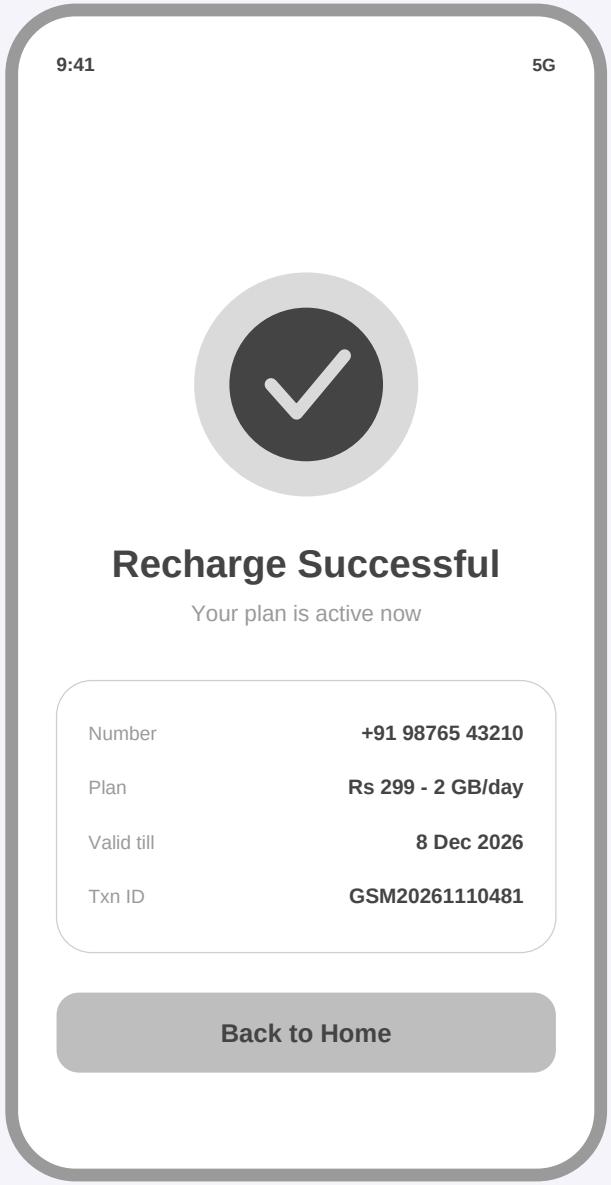
Frame 4 - Plans



Frame 5 - Recharge

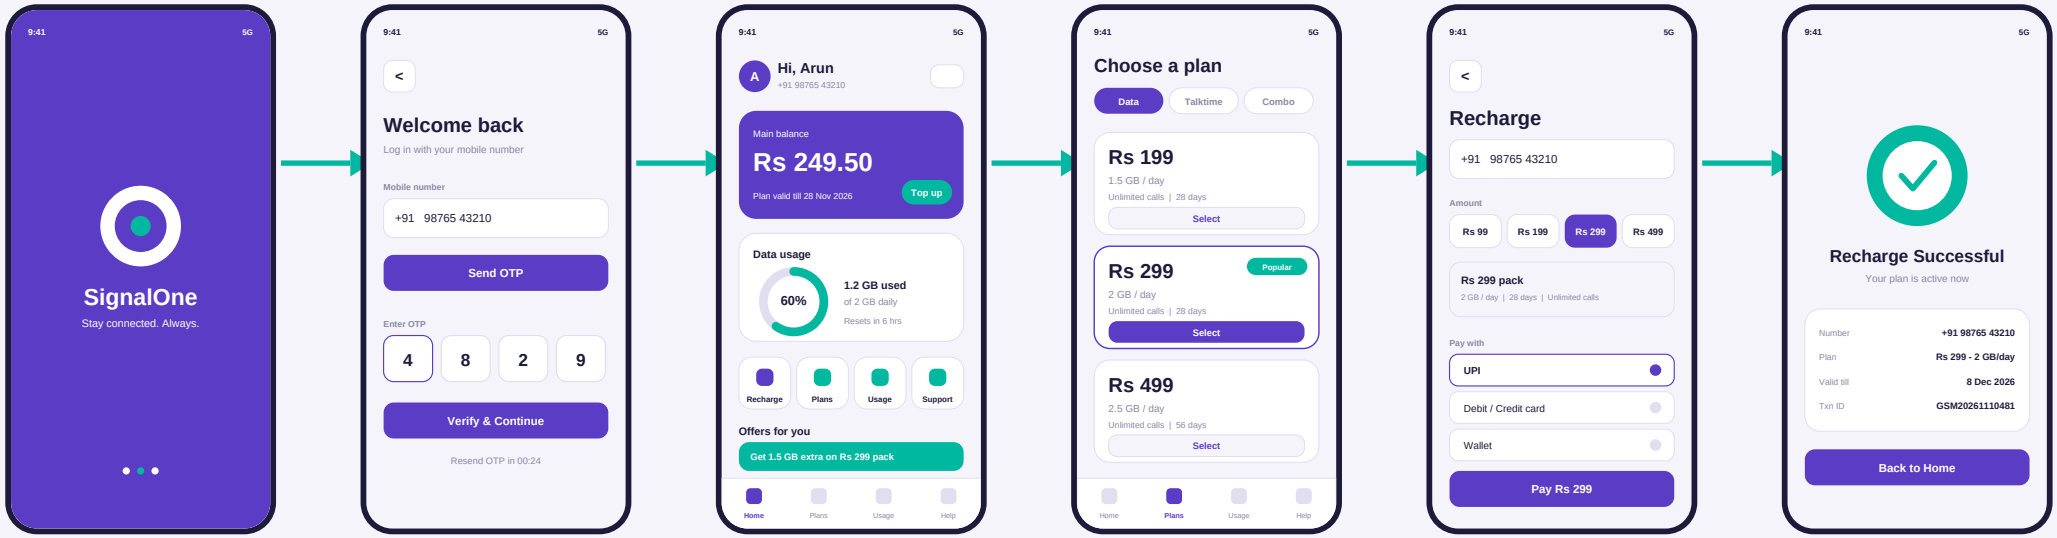


Frame 6 - Success



PART 2 - PROTOTYPE: User flow

Figma > Prototype tab



1. Splash | 2. Login | 3. Home | 4. Plans | 5. Recharge | 6. Success

Main flow: Splash > Login / OTP > Home > Plans > Recharge > Success > Home

- Hotspots: wired in Figma Prototype mode by dragging the blue connector from the button to the next frame.
- Shortcuts on Home: 'Recharge' opens Recharge, 'Plans' opens Plans; bottom navigation links all main tabs.
- Back arrow on Login and Recharge returns to the previous frame (Navigate back).
- Start the flow from Frame 1 (Splash) and press Play (top right) to test on a phone frame.

PART 2 - PROTOTYPE: Interaction settings

Applied to each connection in Figma

From frame	Trigger element	Trigger	Action	Animation
1 Splash	Whole frame	After delay 2000 ms	Navigate to	Dissolve, 300 ms
2 Login	Verify & Continue button	On click	Navigate to Home	Move in (right), Ease out
3 Home	Recharge quick action	On click	Navigate to Recharge	Smart animate, 300 ms
3 Home	Plans tab / card	On click	Navigate to Plans	Smart animate, 300 ms
4 Plans	Select (Rs 299)	On click	Navigate to Recharge	Move in (right)
5 Recharge	Pay Rs 299 button	On click	Navigate to Success	Push (up), 400 ms
5 Recharge	Back arrow	On click	Navigate back	Move out (left)
6 Success	Back to Home	On click	Navigate to Home	Dissolve, 300 ms

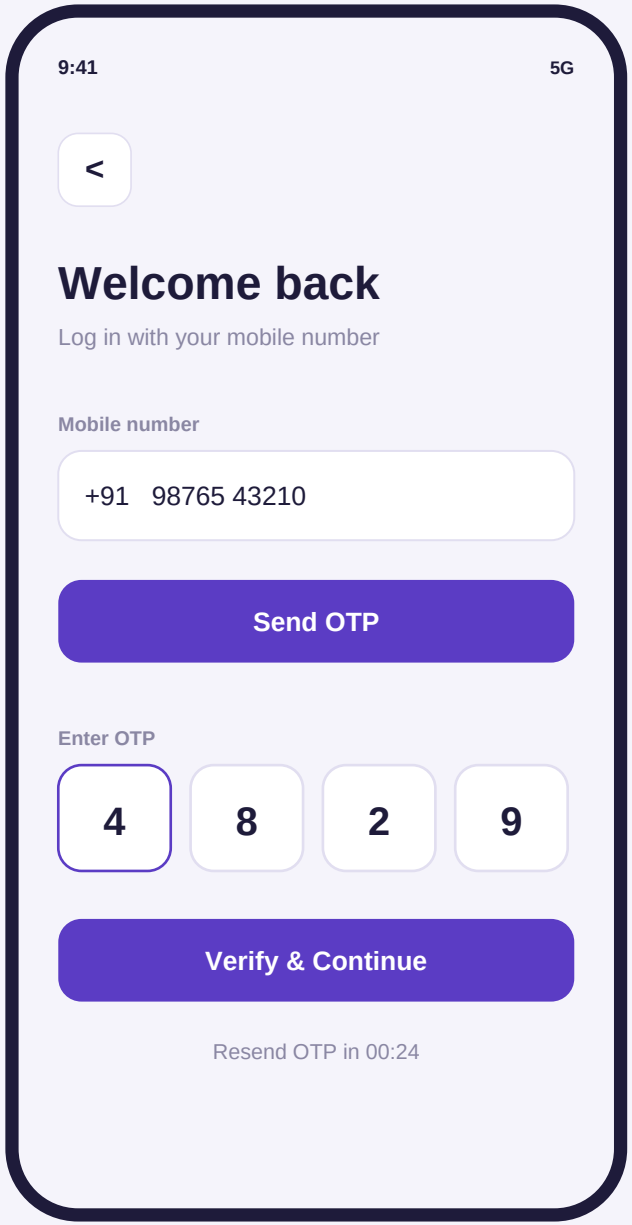
Device preset: iPhone 14 (390 x 844) | Flow starting point: 1 Splash | Background: #F5F4FB

PART 3 - OUTPUT: Final high-fidelity screens (1/2)

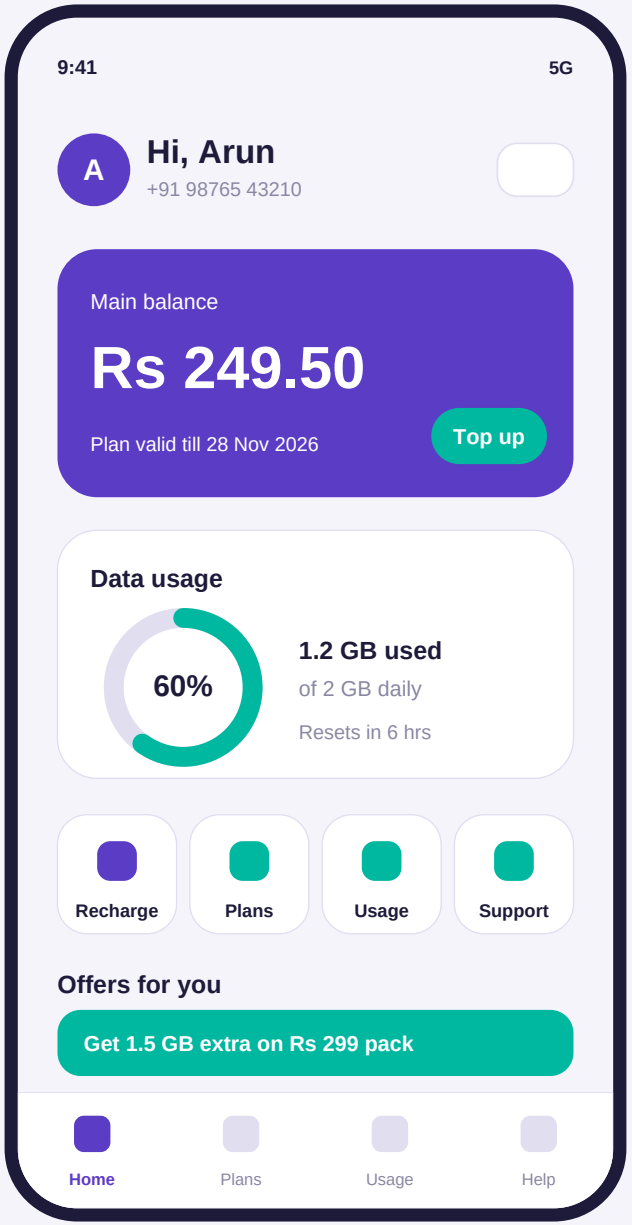
Result of the prototype

Screen 1 - Splash

Screen 2 - Login



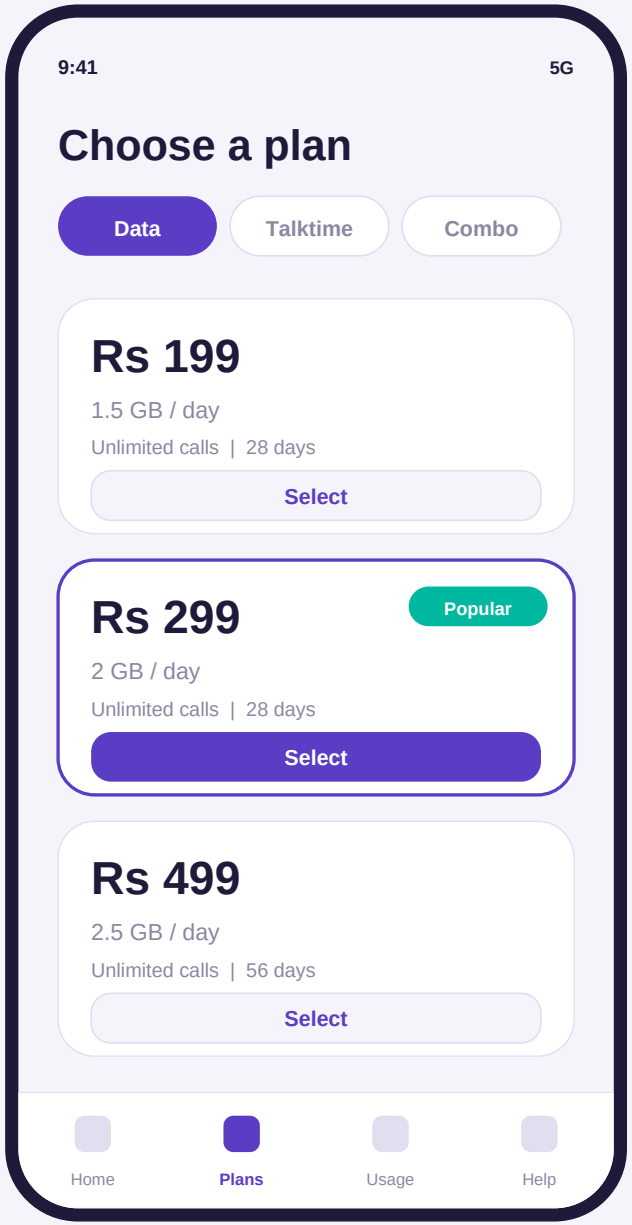
Screen 3 - Home



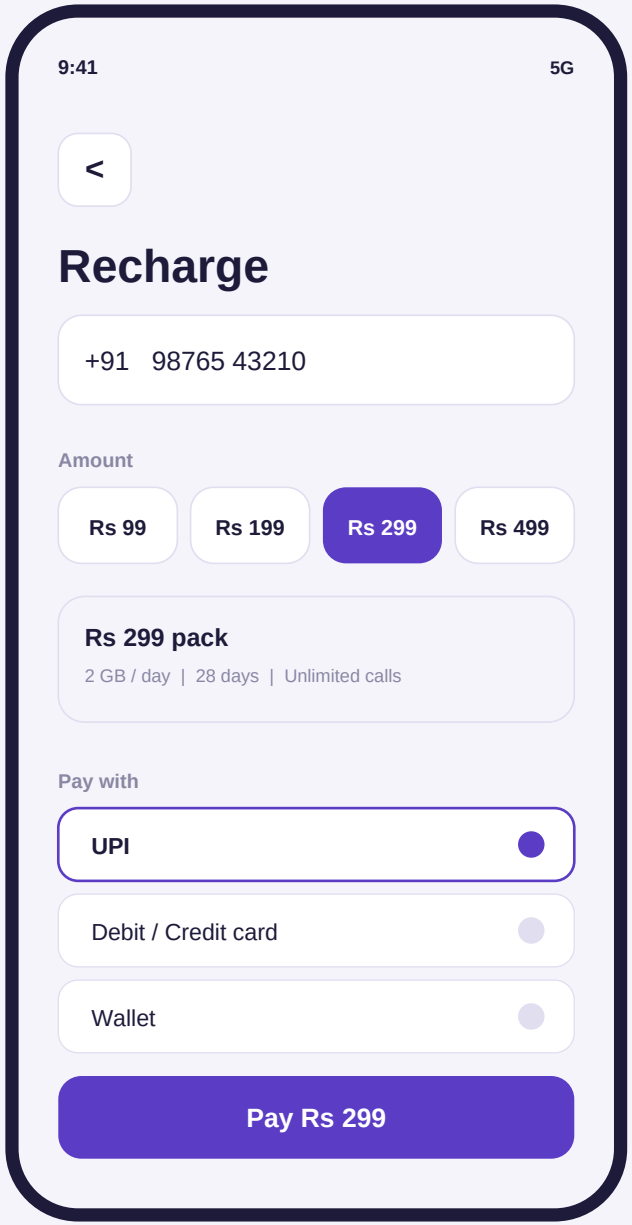
PART 3 - OUTPUT: Final high-fidelity screens (2/2)

Result of the prototype

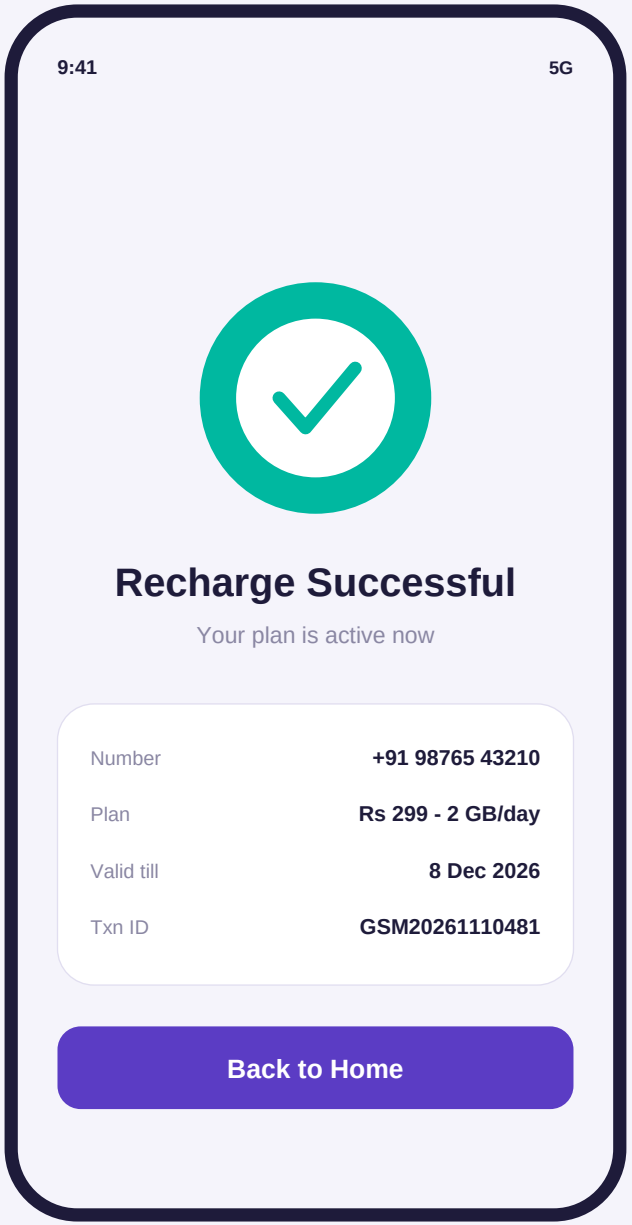
Screen 4 - Plans



Screen 5 - Recharge



Screen 6 - Success



How to build this in Figma

Step-by-step procedure

1. Open Figma > New design file; rename it 'GSM Service App'.

2. Press F, choose Phone > iPhone 14; create 6 frames and name them Splash, Login, Home, Plans, Recharge, Success.

3. Create Local styles: colours (Primary #5B3CC4, Accent #00B8A0, etc.) and text styles (H1, H2, Body, Caption).

4. Draw wireframes with rectangles (R), text (T) and ellipses (O); add Auto Layout (Shift+A) to cards and buttons.

5. Make Components (Ctrl/Cmd+Alt+K): button, input field, plan card, bottom nav; add Variants for selected state.

6. Apply colours, corner radius and shadows to turn wireframes into hi-fi screens.

7. Switch to the Prototype tab; drag the connector from each button to the next frame and set Trigger, Action, Animation (see page 6).

8. Set the flow starting point on Splash and press Play to test the prototype.

9. Output: select all frames > Export (right panel) > PNG 2x; then File > Export frames to PDF to get the ordered PDF.

(Figma exports frames to PDF in layer order, so keep frames ordered 1-6 left to right.)
